

# EXPLORE PROMPT

## Module 12 – Encodements Transcript

**Welcome to Module 12 Explore Prompt, last month we downloaded Encodements 1 – 6 and activated 1– 6 level Lightbody's. This month we download Encodements 7 – 12 and activate 7 – 12 Level Lightbody's Let's Dive In.**

### Seventh Level Lightbody

In the Seventh level activation, the focus moves to our heart energy center our heart energy center is now opened up at deeper and deeper levels. Emotional blocks at deep levels get opened and there are no restrictions to our 'vastness'.

Feelings get intensified, sadness, anger, and happiness and expression is easier. We begin to live in the Now. Our mental body lives in our future. Our emotional body in our past. At this point, if we've got blocks in our emotional body.

They begin to show up, because as we move toward expressing our divinity and our vastness, anything that blocks that vastness begins to release. Some of its fun, some of its not. It depends on how much of a stranglehold our mental body has on us.

When our mental body is in sync, the release is quick and easy. At this time we also start to shift from karmic relationships to non-karmic relationships. We have shifted away from emotional entanglement, and attachment, but are fully conscious at a subtle level.

We are actually embracing "in love". Our physical heart has a membrane, which is called ironically "The Gates of Eden". The membrane is Forgetfulness, veils of separation. With the Seventh body, the membrane disappears, without us having to do anything.

"Such a being of light has to live in Eden. That's the only place such a being can live in". We come back home. The membrane just disappears physically there are heart fibrillations and chest pains. When we do something like the encodements experience prompt, we assist our Lightbody process.

Assisting that energy center merger also assists our energy bodies emotional, mental and spiritual bodies begin to merge. They merge into a unified field and in the seventh level those energy centres are kicking into merged states that they haven't been in before.

At this point our physical body will take in as much light as is poured into it without any damage caused to it. Now there is no fear in the cells. Allowing vast amounts of energy comes in.

We grow and bloom. Because our heart is so open, we are living in the frequency of universal Love. As our 4 lower bodies merge, residuary survival issues that need to be tackled will strongly come to the forefront.

The opening of the pituitary and pineal glands can sometimes cause heaviness at the top of the head and the back of the neck. Now the 4th eye opens up and allows multidimensional sight. The 4th eye is the 'soft spot' on the top of your head which may give stabbing pains if there are etheric blocks.

Often at this stage we begin to function as Fourth dimensional persons 'awakeners'. All light workers have two traps; Spiritual significance and spiritual ambition. They are both our defence systems. Spiritual significance is a defence against shame and worthlessness. Spiritual ambition is our defence against guilt and incompetence.

### Eighth Level Lightbody

Dealing with experiencing Spirit completely, our brain is undergoing a change. It can be unsettling. When physical changes take place in our brain we experience that which we had not experienced earlier. We can feel as if we have Alzheimer's. Physical symptoms on all levels are very close to physical illnesses.

When the symptoms are because of Light activation, no test will show anything. It is light body activation. We are all going through light body activations and our physical gets 'traumatized' because of the new infusions of light.

At our eighth level of Lightbody, our pituitary and our pineal gland, generally about the size of a pea, begin to grow and change shape. As they grow, we can feel pressure in our head.

We may or may not have headaches off and on through this process. We can ask our guides to increase the endorphins in this area and ease the pain of the mutation process. Our brain gets bigger and we may experience cranial expansion.

As we transition into the eighth level of Lightbody, there is an activation of what we call the seed crystals. These three small crystals receive Light languages from the upper dimensions.

Two of the crystals are located over our eyebrows, directly over the pupils if we are looking straight ahead. The third one is just below our hairline, in line with our nose. There is also an activation of our recorder cell receiver crystal (on the right side of our head).

In the higher dimensions, there is a structure called a recorder cell crystal that holds vast amounts of information that the soul has gathered over many incarnational cycles on various planets and stars.

Periodically, the recorder cell will download parts of the experiential data into the receiver crystal. When this happens, many people feel a tingling, burning, or liquid sensation in the area of the head where the receiver crystal is located.

Suddenly they have all this information and they can't figure out where it has come from. These four spots, three seed crystals and the receiver, are activated. When the activation takes place, the 'unsettlement' starts. We begin to experience geometry and tones, we don't see things in the shape they are meant to be.

We may see, up near our eyes, or when we shut our eyes, helixes and tetrahedrons. We may hear ringing in our ears which can be extremely uncomfortable. We see flashes of light. We see colours. We begin to see in front of our eyes, various symbols or signs, words of a language we don't know. And we wonder "What does it all mean? Seeing things but not knowing what it is."

By now, the unification of our energy centres have begun, which affects our mental, spiritual, physical, etheric fields. Our brain functioning begins to change and we begin to perceive and think in terms of geometries and tones. We may have challenges with remembering things or projecting into the future.

The crazy thing about eighth level of Lightbody is "To gain the 95% of our brain that I haven't used, why did I have to lose the 5% I already had?" All of the pathways in our brain that we are accustomed to using may become non-accessible while entirely new pathways are being created.

We ask for the ability to translate this information coming in. This is the Language of the Light. We are feeling something but there are no words to really describe what we are going through.

Simply ask for guidance around translation. AND don't stop It is given to you at the level of the 9th activation. It is important to keep asking for guidance around translation

On the 7th level we experienced changes in personal relationships. Now Spirit is directing us. Anyone who wishes to connect through coercion, manipulation, emotional blackmail, and so on, will suddenly start falling away.

In the 7th level we began to change the way we related to others. Relationships will fall away. Friends will disappear and we may feel a sense of being alienated.

Now our only focus is development of Spirit in Action. Spirit Will now guides us to those who are meant to support us through the remaining four levels of activation. Going through the process is not an option. When we desire to go through the process, that's an option.

### Ninth Level Lightbody

Not allowing ego to lead out of habit only by choice. In the Ninth level, only Spirit guides us. At Ninth level we are at the threshold of the Tenth dimension. At the Ninth level activation, most people go through a phase of 'no sex'. Sex becomes something the physical does not need.

There is genuinely no desire for sex. We may want to have sex but now it is completely Spirit led. We do what we need to do because Spirit wants us to do it. As we transition into the ninth level of Lightbody, the translation opens and we begin to understand tonal languages.

It becomes something we can recognise. These geometries and patterns that we are working with in our mind become coherent: they are a language. Our Spirit is using these languages to shift the sixth-dimensional structure of our blueprint into a new template for our fifth-dimensional Lightbody. We are beginning to embody Divinity.

The seventh-dimensional threshold may activate, causing lower back or hip pain, and a feeling of density in the pelvic floor. The seventh-dimensional structures are shifting into alignment with our Oversoul. New Alpha/Omega structures are opening around our physical body, allowing more energy to pour in.

The fifth and sixth dimensional etheric structures are coordinated through the seventh dimensional alignment with our Oversoul to receive a new Adam Kadmon, the Divine Image.

We may, at this point experience body shifts. We may find ourselves a whole lot taller, or whole lot thinner, or bigger, or grow wings. We may become aware that we have other body types than that of a human. And we may begin to integrate non-human identities into the human body.

The pituitary gland is opening further and producing more growth hormone. In some women an oestrogen imbalance may occur. We may feel exhausted, depressed, and alienated.

Sometimes our periods may become irregular, or we may have changes in our flow. We are not interested now in what anyone thinks or says about us. This is a great shift.

Till this stage there are a few fears, here and there. But with this shift we completely experience ourselves as Spirit In Action. Our ego is getting weaker and the choices that we make are more Spirit led.

Now we are joined with Divine Oversoul. This means the highest level of our higher bodies are now one with the highest level of our higher selves. We are connected up with all of them, and are getting ready to join with the Divine Oversoul, and The Source.

The three-fold flame, Divine Truth, Divine Love and Divine Light, expands and burns bright. We speak nothing but divine truth. We will feel nothing but divine love, and we will emanate nothing but Divine Light.

When this happens we are in the 10th level where we now manifest the abilities of an Avatar. So, as we began the shift to the ninth level of Lightbody, we began a very powerful shift to our multi-dimensional self.

We are making it real and manifesting. The master that we are. We came to this planet to master the limitations of separation. Now the game is shifting into who we really are in our vastness.

In the 9th, 10th, 11th and 12th level all the work done in the etheric. When we have passed the 8th level, we have surrendered to Spirit completely. Not allowing ego to lead out of habit, only with choice. In the 9th level, only spirit guides us.

### Tenth Level Lightbody

In the tenth level, we begin to manifest avatar abilities. That means that we can be exactly where we want, when we want. Teleportation and manifestation come in at this level of Lightbody, because we are fully conscious of being one with the Source and being everything.

When we are All That Is, what is not us? We are the universe, recreating itself according to our pictures of reality. At the tenth level we finish the hook ups and operate from our vastness, from what is called our Godself.

We feel connected to everything. We begin to build a Merkabah vehicle within our energy structures. This crystalline Light structure allows us to pass through space, time and dimensions completely in our totality.

The Merkabah has a consciousness of its own. We construct this crystalline Light structure out of our own fields, with the assistance of our Spirit. We now begin to work consciously according to our axis. Merkaba is the chariot for Spirit.

The space brotherhood, while building their own Merkaba's, hook up their Merkaba's to each other's and make a huge vehicle that encompasses the planet that is about to ascend.

They have created this huge vehicle which now completely encompasses any planet that is in the ascension process as is the Earth. What do the Ascended Masters do? The directors and the navigators. The Ashtar are a group of extra-terrestrials. Their Commander-in-Chief, an Ascended Master.

The Master navigator is here to guide the Light vehicle created by the Space brotherhood. Guiding the Ashtar brotherhood, so that the planet Earth can physically move out of this Solar system into a multi-star system.

There are systems where we have more than one sun. Those are the highly evolved systems. We are only a one sun system. The Ashtar have created the vehicle for this movement and the Ascended Masters are navigating this ship, this Merkaba, for the Earth to move out of this solar system into a multi-star solar system.

What of the angelic realm? They are there to support the space brotherhood and the ascended masters. Truly selfless and dedicated workers. When the Earth moves, these workers will then decide whether they want to go back into energy form, which means merge with the divine energy again, or they want to take on a light body and move into a different system.

Once this planet moves the third dimension will collapse, which means generations will not understand what the third dimension really was, because it has collapsed.

**The Angelic Function** – moving into Lightbody or returning to pure energy form as incarnate Angelics, our energy is the fuel for this process.

**The Space Brotherhood & Sisterhood** – hooking up all the Merkaba vehicles to link them around the planet forming the planetary Lightbody literally building the vehicle for this planet to ascend.

**The Ascended Master Function** – This axis will act as directors and navigators. They are here to work with the coordinators for taking this solar system out of this area to a multi-star system

### Eleventh and Twelfth Lightbody

At the end of the ninth level the universe considers you Master and treats you, supports you, as such. Then in the 11th dimension we shall decide whether we want to continue as Light workers and ascend with the Earth. We shall decide whether we want to be light bodies and ascend ahead of the Earth.

For the first time choice is given to us to ascend ahead of the Earth in the Eleventh activation. We are operating fully from our God-self and there is no separation. You have now caught up with our Spirit.

Time is speeding up to the point where it becomes simultaneous. Or we decide neither and we decide to be one with the Source again. Only a living Master can be given that

choice, to continue with the Earth, ahead of the Earth or merge with the Source. And in the Twelfth the decision that we made in the Eleventh is implemented in its entirety. So if we decided to merge in the Twelfth dimension we will be the Source. If we decided to move with the Earth as the Earth moves, we will move.

**Now it is over to you**

Next week when we do Experience Prompt 1 I invite you to find a quiet place where you can be uninterrupted for 90 minutes.

You may like to create a sacred space by lighting candles or burning essence oils. Then simply breathe and listen to the prompt allowing my voice to guide you.

I invite you to make sure that you are hydrated before and after the session as our brain requires neurons to create new neural pathway and neurons require water.

See you on the path

*Blessed Be*
